

COMBINING TMJ, SDB & MYOFUNCTIONAL DISORDERS

1-DAY ADVANCED TRAINING SESSION

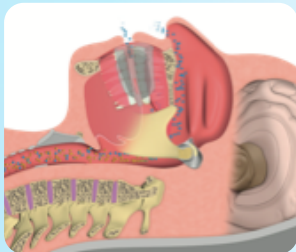

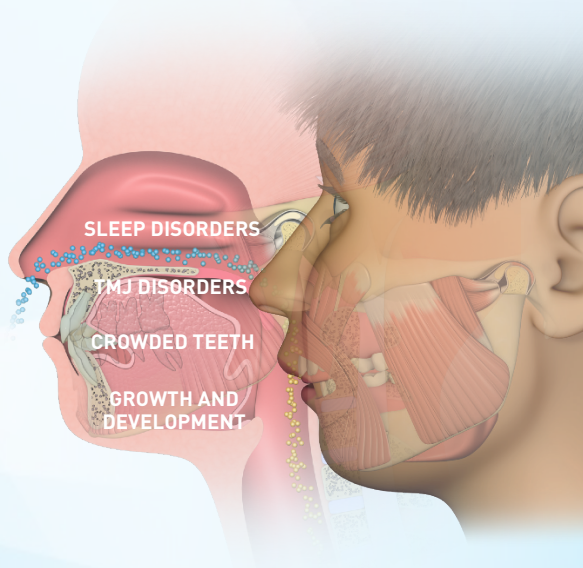

14th December 2023 in Tallinn, Estonia

MRC seminars will teach you the Myofunctional evaluation system that identifies breathing and myofunctional problems limiting facial growth and causing malocclusion, as well as provide you with the ability to treat myofunctional problems evident in almost every child.

A complete training program for orthodontic, dental and non-dental professionals.

LEARNING OUTCOMES

- Identify the underlying causes of malocclusion, evaluation and diagnosis.
- A comprehensive guide for the implementation of the Myobrace Activities program in your practice.
- Diagnosis and treatment of OSA and Breathing Disorders in adults and children.
- Myofunctional Orthodontics - treating the causes rather than the symptoms of malocclusion, evaluation & discussion of cases included.
- Effectively educate parents and patients to achieve consistent results.
- An extensive presentation of treatment possibilities with MRC's treatment systems Myobrace, Myosa and TMJBDS.
- Treatment planning and case discussion.

Airway correction for children and adults

Immediate diagnosis and treatment of TMJ Disorder

MRC's activities program and fast track for all age groups

SPEAKER

NIELS HULSINK

Int. Lecturer, Training and Product Manager

Niels Hulsink joined Myofunctional Research Co. Europe in 2004 and since then has spoken to thousands of practitioners about the benefits of Myofunctional treatment and breathing correction. Due to his excellent knowledge regarding early intervention he has lectured at numerous international dental and orthodontic meetings and has presented training sessions to orthodontists, general dentists and speech therapists all around Europe & North and South Africa.

Prior to joining MRC Europe, Niels Hulsink filled various positions in the orthodontic field and clinics and was involved in the development of an indirect bonding system.
